INTERNATIONAL JOURNAL OF PRODUCTION RESEARCH

CONTENTS

Volume 35, 1997

International Journal of Production Research

Editor in Chief
Professor Roy J. Sury, PhD, CEng
Department of Manufacturing Engineering, Loughborough University of Technology
Leicestershire LE11 3TU, UK

Editor
John E. Middle, MSc, CEng

Reviews Editor
Geoffrey F. Modlen, PhD, CEng

Editorial Board

Australia:	Dr E. J. A. Armarego, The University of Melbourne
	Dr G. M. Buxey, Deakin University
Belgium:	Professor L. F. Gelders, Centre for Industrial Management, Leuven
Canada:	Professor G. Abdulnour, Université du Quebec à Trois Rivières
France:	Professor J. E. Erschler, INSA-LAAS-CNRS, Toulouse
Germany:	Professor Dr-Ing H. Bullinger, Fraunhofer-IAO, Stuttgart
	Professor Dr-Ing H. J. Warnecke, Fraunhofer-IPA, Stuttgart
India:	Dr S. Sahu, Indian Institute of Technology, Kharagpur
Israel:	Professor E. Dar-El, Technion-Israel Institute of Technology, Haifa
	Professor D. Sipper, Tel Aviv University
Italy:	Professor U. Bertele, Politecnico di Milano, Milano
Japan:	Professor M. Yamamoto, Hosei University, Tokyo
	Professor H. Yamashina, Kyoto University, Kyoto
The Netherlands:	Professor Dr J. W. Bertrand, Technische Universiteit Eindhoven, Eindhoven
Poland:	Professor Dr Z. Wilimowski, Technical University of Wroclaw, Wroclaw
PR China:	Professor W. S. Lau, Hong Kong Polytechnic University
	Professor S. C. Wang, Beijing University of Aeronautics and Astronautics, Beijing
Singapore:	Professor L. Lim, Nanyang Technological University
South Africa:	Professor R. Reinecke, University of Stellenbosch
South Korea:	Dr H. Hwang, Korea Advanced Institute of Science and Technology
Sweden:	Professor S. Axsäter, Lund University
Switzerland:	Professor Dr F. Rehsteiner, Zürich
United Kingdom:	Professor C. B. Besant, Imperial College of Science and Technology, London
	Professor M. Brady, University of Oxford, Oxford
	Professor R. H. Hollier, University of Manchester
	Professor J. E. L. Simmons, Heriot-Watt University, Edinburgh
USA:	Professor J. F. Bard, The University of Texas at Austin, Texas
	Professor W. L. Berry, Ohio State University, OH
	Dr T.-C. Chang, Purdue University, IN
	Dr P. Dewhurst, University of Rhode Island, RI
	Professor J. N. D. Gupta, Ball State University, IN
	Professor S. R. T. Kumara, The Pennsylvania State University, PA
	Professor W. L. Maxwell, Cornell University, NY
	Dr D. L. Woodruff, The University of California at Davis, CA
Founding Editor:	Professor N. A. Dudley, Emeritus Professor, University of Birmingham, UK

Subscription Information

International Journal of Production Research (ISSN 0020–7543) is published monthly by Taylor & Francis Ltd, 1 Gunpowder Square, London EC4A 3DE, UK. Tel: +44 (0)171 583 0490; Fax: +44 (0)171 583 0581.

Annual subscription 1998 £921, US$1520. Personal subscription 1998 to members of the Manufacturing Division of the Institution of Electrical Engineers: £159, US $264. Personal subscriptions are available to home addresses only and must be paid for by personal cheque or credit card.

The current volume of *International Journal of Production Research* is available as an electronic, on-line edition. Colour illustrations which are reproduced in black-and-white in this print edition may appear in colour in the on-line edition. Please contact Taylor & Francis for details on subscribing: email online@tandf.co.uk: internet: http://www.tandf.co.uk

Periodical postage paid at Jamaica, New York 11431. USA. US Postmasters: send address changes to *International Journal of Production Research*. Publications Expediting Inc., 200 Meacham Avenue, Elmont, New York 11003, USA. Air freight and mailing in the USA by Publications Expediting Inc.

Typeset by Keyword Publishing Services Ltd., and printed in the UK by MPG Rochester Ltd., Rochester, Kent. The paper used in this publication is 'acid free' and conforms to the American Standards Institute requirements in this respect.

Dollar rates apply to subscribers in all countries except the UK and the Republic of Ireland where the pound sterling price applies. All subscriptions are payable in advance and all rates include postage. Journals are sent by air to the USA, Canada, Mexico, India, Japan and Australasia. Subscriptions are entered on an annual basis, i.e. January to December. Payment may be made by sterling cheque, dollar cheque, international money order, National Giro, or credit card (Amex, Visa, Mastercard/Access).

Orders originating in the following territories should be sent direct to the local distributor. **India:** Universal Subscription Agency Pvt. Ltd, 101–102 Community Centre, Malviya Nagar Extn, Post Bag No. 8, Saket, New Delhi 110017. **Japan:** Kinokuniya Co. Ltd, Journal Department, PO Box 55, Chitose, Tokyo 156. **USA, Canada and Mexico:** Taylor & Francis, Inc., 1900 Frost Road, Suite 101, Bristol, PA 19007, USA. **UK and all other territories:** Taylor & Francis Ltd, Rankine Road, Basingstoke, Hampshire RG24 8PR, UK.

International Journal of Production Research

Volume 35, 1997—CONTENTS

No. 1 January 1997

Scheduling a two-machine flowshop with travel times to minimize maximum lateness. J. W. STEVENS and D. D. GEMMILL 1

Design and utilization of a fuzzy knowledge-based system for design feature recognition of free hand illustrations. N. MAKI, T. TABE and G. SALVENDY 17

Cellular manufacturing at 46 user plants: implementation experiences and performance improvements. U. WEMMERLÖV and D. J. JOHNSON 29

An improved Taguchi's method in design of experiments for milling CFRP composite. P. Y. CHAO and Y. D. HWANG 51

An evaluation of capacity planning techniques in a remanufacturing environment. V. D. R. GUIDE, JR., R. SRIVASTAVA and M. S. SPENCER 67

Performance evaluation in production flow analysis. R. DE GUIO and M. BARTH 83

Formulations and heuristics for scheduling in a buffer-constrained flowshop and flowline-based manufacturing cell with different buffer-space requirements for jobs: Part 2. B. SHARADAPRIYADARSHINI and C. RAJENDRAN 101

Alternative manufacturing sequences and tolerance buildup: a point of view and a case study. Y. FATHI, R. O. MITTAL, J. E. CLINE and P. M. MARTIN 123

Utilizing simulation to develop economic equipment selection and sampling plans for integrated circuit manufacturing. S. A. DELURGIO, SR., S. T. FOSTER, JR. and G. DICKERSON 137

Design for agile assembly: an operational perspective. A. KUSIAK and D. W. HE 157

A new algorithm for developing a reference-based model for predicting surface roughness in finish machining of steels. X. D. FANG and H. SAFI-JAHANSHAHI 179

Control policies for multi-product multi-stage manufacturing systems: an experimental approach. M. AMIN and T. ALTIOK 201

Surface interrogation and machining strip evaluation for 5-axis CNC die and mold machining. Y.-S. LEE and H. JI 225

A family of hierarchical models for the design of deterministic assembly systems. A. PINNOI and W. E. WILHELM 253

Production scheduling/rescheduling in flexible manufacturing. A. K. JAIN and H. A. ELMARAGHY 281

Book reviews 311

No. 2 February 1997

A new shop-based and predictive scheduling heuristic for cellular manufacturing. F. MAHMOODI and G. E. MARTIN 313

Distributed cell controllers using colour Petri-nets and Fieldbus: An application in flexible assembly. W. H. R. YEUNG and P. R. MOORE 327

Short-termism and the appraisal of AMT capital projects in the US and UK. F. LEFLEY and J. SARKIS 341

Robust deterministic scheduling in stochastic environments: the method of capacity hedge points. E. J. YELLIG and G. T. MACKULAK 369

A continuous-flow model for production networks with finite buffers, unreliable machines, and multiple products. V. S. KOUIKOGLOU and Y. A. PHILLIS 381

Order review and release strategies in a job shop environment: a review and a classification. D. BERGAMASCHI, R. CIGOLINI, M. PERONA and A. PORTIOLI 399

Factors affecting performance of period batch control systems in cellular manufacturing. D. C. STEELE and M. K. MALHOTRA 421

A comparative evaluation of heuristics for the adjacency problem in facility layout planning. G. WÄSCHER and J. MERKER 447

Steel production schedule generation. I. ASSAF, M. CHEN and J. KATZBERG 467

Modelling the impact of design, tactical, and operational factors on manufacturing system performance. C. R. HARRIS 479

Application of simulated annealing to a linear model for the formulation of machine cells in group technology. S. SOFIANOPOULOU 501

Models and solution methodologies for the generalized grouping problem in cellular manufacturing. K. SHANKER and A. K. AGRAWAL 513

Improving job shop performance by coordinating dispatching rules. O. HOLTAUS and H. ZIEGLER 539

Offsetting lower routeing flexibility in cellular manufacturing due to machine dedication. S. M. SHAFER and J. M. CHARNES 551

Experiences of US- and foreign-owned firms: a new perspective on ISO 9000 implementation. M. EBRAHIMPOUR, B. E. WITHERS and N. HIKMET ... 569

Toward reusable hierarchical cell control software. R. D. BORCHELT and J. THORSON 577

Book reviews 595

No. 3 March 1997

A framework for the systemic control of organizations. J. H. BLACKSTONE, JR, L. R. GARDINER and S. C. GARDINER 597

Managing batch processors to reduce lead time in a semiconductor packaging line. P. CHANDRA and S. GUPTA 611

Recognition of minimal feature covers of prismatic objects: A prelude to automated process planning. K. A. ALDKHILALLAH and R. RAMESH ... 635

Heuristics for dynamic job shop scheduling with real-time updated queueing time estimates. F.-C. R. CHANG 651

A neural network approach for the analysis of control chart patterns. C.-S. CHENG 667

Statistical attributes of the power learning curve model. S. GLOBERSON and D. GOLD 699

Measurement of instability in multi-level MRP systems. S. N. KADIFASAOGLU and V. SRIDHARAN 713

In-process tool wear monitoring through time series modelling and pattern recognition. S. A. KUMAR, H. V. RAVINDRA and Y. G. SRINIVASA ... 739

Design of serial production systems using discrete event simulation and non-convex programming techniques. Y. A. PHILLIS, V. S. KOUIKOGLOU, D. SOURLAS and V. MANOSIOUTHAKIS 753

Impact of maintenance policies on the performance of manufacturing cells. C. M. KELLY, C. T. MOSIER and F. MAHMOODI 767

A comparison of production-line control mechanisms. A. M. BONVIK, C. E. COUCH and S. B. GERSHWIN 789

Generation and validation of FMS test prototypes. G. K. NAYAK and D. ACHARYA 805

Order review/release and lot splitting in drum-buffer-rope. G. R. RUSSELL and T. D. FRY 827

A framework for a goal-driven approach to group technology applications using conceptual clustering. M. SRINIVASAN and Y. B. MOON 847

Towards a new planning and scheduling approach for multistage production systems. A. HATCHUEL, D. SAIDI-KABECHE and J. C. SARDAS 867

Characterization of the size effect in grinding and the sliced bread analogy. W. B. ROWE and X. CHEN 887

No. 4 April 1997

JIT manufacturing: the evolution to an implementation model founded in current practice. A. HALLIHAN, P. SACKETT and G. M. WILLIAMS ... 901

Evaluating the end-of-life value of a product and improving it by redesign. Y. PNUELI and E. ZUSSMAN 921

Design of material transportation system for tandem automated guided vehicle systems. C. HUANG 943

A cost based strategy for assessing improvements in manufacturing processes. B. R. DEAN, S. HAND and M. KAYE 955

Evaluating scheduling heuristics for non-identical parallel processors. S. U. RANDHAWA and C.-H. KUO 969

Joint optimization of lot-sizes, safety stocks and safety lead times in an MRP system. A. MOLINDER ... 983
A fuzzy outranking method for conceptual design evaluation. J. WANG ... 995
Scheduling on a bottleneck station: a comprehensive cost model and heuristic algorithms. A. D. AMAN and B. XIAO ... 1011
A pragmatic approach to machine and part grouping in cellular manufacturing system design. M. CANTAMESSA and A. TURRONI ... 1031
A practical monitoring strategy for machining process control. C. S. LEEM 1051
Mathematical programming formulation of CONWIP based production lines; and relationships to MRP. Y. T. HERER and M. MASIN ... 1067
An application of fuzzy clustering to cellular manufacturing. A. MASNATA and L. SETTINERI ... 1077
Preprocessing for static and dynamic facility layout problems. T. A. LACKSONEN ... 1095
Tolerance analysis for setup planning: a graph theoretical approach. S. H. HUANG, H.-C. ZHANG and W. J. B. OLDHAM ... 1107
A weighted approach for cellular manufacturing design: minimizing intercell movement and balancing workload among duplicated machines. S.-D. LEE and Y.-L. CHEN ... 1125
Comparing JIT, MRP and TOC, and embedding TOC into MRP. J. MILTENBURG ... 1147
Job shop scheduling with a genetic algorithm and machine learning. C.-Y. LEE, S. PIRAMUTHU and Y.-K. TSAI ... 1171

No. 5 May 1997

An approach of tolerance design for quality improvement and cost reduction. A. JEANG ... 1193
In-plant material buffer sizes for pull system and level-material-shipping environments in the automotive industry. R. R. INMAN, S. BHASKARAN and D. E. BLUMENFELD ... 1213
The multi-bay manufacturing facility layout problem. R. D. MELLER ... 1229
Design and scheduling of hybrid multi-cell flexible manufacturing systems. I. A. KATTAN ... 1239
Formation of machine cells and part families: a modified *p*-median model and a comparative study. J. WANG and C. ROZE ... 1259
Interactive ILP procedures for stacking optimization for the 3D palletization problem. G. ABDOU and J. ARGHAVANI ... 1287
Sequential tolerance control in discrete parts manufacturing. B. P. FRATICELLI, E. A. LETHIHET and T. M. CAVALIER ... 1305
Scheduling job families about an unrestricted common due date on a single machine. M. AZIZOGLU and S. WEBSTER ... 1321

Fuzzy systems for control of flexible machines operating under information delays. R. CAPRIHAN, S. KUMAR and S. WADHWA 1331

Principles of design for laminated tooling. P. M. DICKENS 1349

A comparison of sequencing rules in static and dynamic hybrid flow systems. S. N. KADIPASAOGLU, W. XIANG and B. M. KHUMAWALA ... 1359

A knowledge-cased approach to the generation of IDEF0 models. C. L. ANG, M. LUO, L. P. KHOO and R. K. L. GAY 1385

An algorithm for sub-optimal routeing in series-parallel queueing networks. H. D. GOSAVI and J. MACGREGOR-SMITH 1413

Control policy simulation based on machine age in a failure prone one-machine, one-product manufacturing system. J. P. KENNE, A. GHARBI and E. K. BOUKAS 1431

Integrated lot-sizing and scheduling for just-in-time production of complex assemblies with finite set-ups. M. F. ANWAR and R. NAGI 1447

Fixture analysis under dynamic machining. R. T. MEYER and F. W. LIOU 1471

A note on scheduling hybrid flow systems. S. N. KADIPASAOGLU, W. XIANG and B. M. KHUMAWALA 1491

No. 6 June 1997

Optimal selection of process parameters for turning operations in a CAPP system. A. V. S. R. K. PRASAD, P. N. RAO and U. R. K. RAO 1495

Variance reduction in a process with random linear drift. K. S. AL-SULTAN and M. A. AL-FAWZAN 1523

Improving the product mix heuristic in the theory of constraints. L. D. FREDENDALL and B.-R. LEA 1535

An efficient real-time deadlock free control algorithm for automated manufacturing systems. C.-O. KIM and S. S. KIM 1545

Analysis of dynamic robust design experiments. S. D. MCCASKEY and K.-L. TSUI 1561

Dynamic selection of dispatching rules for manufacturing system scheduling. H. PIERREVAL and N. MEBARKI 1575

Profile offsetting for feature extraction and feature tool mapping in sheet metal. M. DEVARAJAN, M. KAMRAN and B. O. NNAJI 1593

Model-based diagnosis of special causes in statistical process control. K. DOOLEY, J. ANDERSON and X. LIU 1609

Grouping components in printed circuit board assembly with limited component staging capacity and single card setup: problem characteristics and solution procedures. M. S. DASKIN, O. MAIMON, A. SHTUB and D. BRAHA 1617

An experimental comparison of capacity rationing models. J. W. PATTERSON, N. BALAKRISHNAN and V. SRIDHARAN 1639

Automated production line design with flexible unreliable machines for profit maximization. A. KALIR and Y. ARZI 1651

Management Petri net—a modelling tool for management systems. H. M. SHIH and C. K. H. LEUNG 1665

Total quality management in the supply chain: what is its impact on performance? L. B. FORKER, D. MENDEZ and J. C. HERSHAUER 1681

Optimal cycle time and production rate in a family production context with shelf life considerations. S. VISWANATHAN and S. K. GOYAL 1703

The target mean problem for an arbitrary quality characteristic distribution. W. LIU and M. RAGHAVACHARI 1713

Discrete event control of production flows: make-to-stock and make-to-order environments. K. KOGAN 1729

PN ⇔ PLC: A methodology for designing, simulating and coding PLC based control systems using Petri nets. A. TAHOLAKIAN and W. M. M. HALES 1743

Generalization and evaluation of vectorial tolerances. H.-T. YAU 1763

An improved algorithm for solving the economic lot size problem (ELSP): A note. S. DITT and H. KUHN 1785

No. 7 July 1997

Tool collision detection in machining using spatial representation technique. B. K. A. NGOI, S. H. YEO and S. B. TAN 1789

Job shop scheduling with delay-renewable resources: a comparison of decomposition strategies. A. ALFIERI and P. BRANDIMARTE 1807

DoorFAST: A constructive procedure to optimally layout a facility including aisles and door locations based on an aisle flow distance metric. B. BENSON, B. L. FOOTE, J. CHEUNG and S. PULAT 1825

A computerized algorithm for milling non-convex pockets with numerically controlled machines. A. T. M. JAMIL 1843

An algorithm for the cell formation and the machine selection problems in the design of a cellular manufacturing system. A. BEAULIEU, A. GHARBI and AIT-KADI 1857

Feature-based control chart pattern recognition. D. T. PHAM and M. A. WANI 1875

Multi-period international facilities location: an algorithm and application. C. CANEL and B. M. KHUMAWALA 1891

Modelling flow of demand through a bill of manufacture. R. L. MARTIN ... 1911

A case-based NC code generating system for prismatic parts. D. BEN-ARIEH and M. CHOPRA 1925

A decision-making perspective on hybrid manufacturing system control. D.-C. GONG 1945

Shiftwork scheduling algorithms with phase-delay feature. R. HUNG ... 1961

Group technology revisited: a simple and robust algorithm with enhanced capability. M.-L. Li and R. E. Parkin 1969
Evaluation of Just-In-Time alternatives in the electric wire-harness industry. F. Estrada, J. R. Villalobos and L. Roderick 1993
Foundations for analytical models of staircase traversal of convex polygonal surfaces. S. V. Kamarthi, S. Pittner and S. T. S. Bukkapatnam ... 2009
Cell formation in group technology: a combinatorial search approach. A. J. Vakharia and Y.-L. Chang 2025
Material flow analysis and volume distance sampling in heuristic line layout procedures. C. J. Malmborg and F. A. Bukhari 2045
Rescheduling job shops under random disruptions. R. J. Abumaizar and J. A. Svestka 2065

No. 8 August 1997

Complexity of the AGV shortest path and single-loop guide path layout problems. M. C. De Guzman, N. Prabhu and J. M. A. Tanchoco ... 2083
Managing product variability by virtual products. K. A. Olsen and P. Sætre 2093
Numerical investigation of optimal policies for production flow control and set-up scheduling: lessons from two-part-type failure-prone FMSs. G. Liberopoulos and M. Caramanis 2109
Features extraction with the consideration of manufacturing processes. J. Dong and S. Vijayan 2135
Application of data envelopment analysis for cell performance evaluation and process improvement in cellular manufacturing. S. Talluri, F. Huq and W. E. Pinney 2157
A semantically constrained Bayesian network for manufacturing diagnosis. R. W. Lewis and R. S. Ransing 2171
The relationship between the physical layout of the work stations and the productivity of a saturated single-hoist production line. O. Grunder, P. Baptiste and D. Chappe 2189
A model management system (MMS) for the design and operation of production lines. H. T. Papadopoulos and G. A. Vouros 2213
Conjoint measurement approach for machine-part grouping in manufacturing cell formation. S. K. Mukhopadhyay and C. Bhandari 2237
Solutions to a modified tool loading problem for a single FMM. J. Rupe and W. Kuo 2253
A heuristic solution approach to the machine loading problem of an FMS and its Petri net model. M. K. Tiwari, B. Hazarika, N. K. Vidyarthi, P. Jaggi and S. K. Mukhopadhyay 2269

Identification of important features for machining operations sequence generation. Z. Gu, Y. F. Zhang and A. Y. C. Nee 2285
A flowshop scheduling problem with two operations per job. J. N. D. Gupta 2309
Flow control in kanban based multicell manufacturing: I. A structural analysis of general blocking design space. R. Ramesh, S. Y. Prasad and M. V. Thirumurthy 2327
The multi-dimensional aspects of a group technology algorithm. R. E. Parkin and M.-L. Li 2345
A new approach to the block layout problem. S. A. Irvine and I. Rinsma-Melchert 2359
Book review 2377

No. 9 September 1997

Simultaneous scheduling of workpieces, fixtures and cutting tools within flexible machining cells. S. Rahimifard and S. T. Newman 2379
Boundary defect recognition using neural networks. T. Kim and S. R. T. Kumara 2397
Flow control in kanban based multicell manufacturing: II. Design of control systems and experimental results. R. Ramesh, S. Y. Prasad and M. V. Thirumurthy 2413
The implementation of information systems for maintenance management. I. Hipkin 2429
Optimal constrained adjustments for quality control. E. Del Castillo ... 2445
Avoidance of deadlocks in flexible manufacturing systems using a capacity-designated directed graph. D.-S. Yim, J.-I. Kim and H.-S. Woo 2459
The Vertex Splitting Algorithm for facilities layout. K. H. Watson and J. W. Giffin 2477
A refined flexible inspection method for identifying surface flaws using the skeleton and neural network. C. Wang and S.-Z. Huang 2493
Optimal disassembly of complex products. A. J. D. Lambert 2509
A station model for continuous materials flow production systems. S. Yeralan and B. Tan 2525
A parametric procedure for multicriterion sequence scheduling for Just-In-Time mixed-model assembly lines. H. Aigbedo and Y. Monden 2543
A fuzzy linguistic approach to data quantification and construction of distance measures for the part family formation problem. A. Gill and C. R. Bector 2565
A post-industrial paradigm: to integrate and automate manufacturing. M. A. Vonderembse, T. S. Raghunathan and S. Subba Rao ... 2579
Neural network-based quality controllers for manufacturing systems. R. B. Chinnam and W. J. Kolarik 2601

Selection of an optimal set of cutting-tools for a general triangular pocket. D. VEERAMANI and Y.-S. GAU 2621
A semantically constrained neural network for manufacturing diagnosis. R. S. RANSING and R. W. LEWIS 2639
Book reviews 2661
Announcement 2665
Erratum 2666

No. 10 October 1997

A max-algebra approach to the robust distributed control of repetitive AGV systems. M. B. ZAREMBA, A. OBUCHOWICZ, Z. A. BANASZAK and K. J. JEDRZEJEK 2667
Adaptive pull-type production control using Kalman Filters. R. QUINTANA, B. K. LAMBERT and L. RODERICK 2689
Maximum principle-based methods for production scheduling with partially sequence-dependent setups. E. KHMELNITSKY, K. KOGAN and O. MAIMON 2701
The distributive area ratio in determination of protective packaging design configuration. S.-W. LYE, S. CHUCHOM and S. S.-G. LEE 2713
A general inspection plan for critical multicharacteristic components. S. O. DUFFUAA and H. J. AL-NAJJAR 2723
An uncertainty importance measure of activities in PERT networks. J. G. CHO and B. J. YUM 2737
A decomposition model for continuous materials flow production systems. B. TAN and S. YERALAN 2759
An objective-guided ortho-synapse Hopfield network approach to machine grouping problems. S. ZOLFAGHARI and M. LIANG 2773
Design of a rule-based flexible manufacturing system controller using modified IDEF0 methodology. S. G. CHEN, M. Z. WU and R. K. LI 2793
A robust design methodology for Kanban system design. F. MOEENI, S. M. SANCHEZ and A. J. VAKHARIA 2821
Automated feature accessibility algorithm for inspection on a coordinate measuring machine. C. W. ZIEMIAN and D. J. MEDEIROS 2839
Simple priority rule combinations: an approach to improve both flow time and tardiness. S. BARMAN 2857
Kitting in multi-echelon, multi-product assembly systems with parts substitutable. J. F. CHEN and W. E. WILHELM 2871
Influence of dressing parameters on grinding performance of CBN/Seeded Gel hybrid wheels in cylindrical grinding. Z. PRUSAK, J. A. WEBSTER and I. D. MARINESCU 2899
Simulation of cylindrical plunge grinding based on the behaviour of cutting edge wear. E. S. LEE, J. K. LEE and M. Y. YANG 2917

Book reviews 2939
Announcement 2941
Erratum 2945

No. 11 November 1997

Case-based reasoning in scheduling: reusing solution components. P. CUNNINGHAM and B. SMYTH 2947
On the equivalence of operational performance measurement and multiple attribute decision making. C. PARKAN and M. L. WU 2963
Due-date based loading and scheduling methods for a flexible manufacturing system with an automatic tool transporter. H.-K. ROH and Y.-D. KIM 2989
Organizational development and time-based flexibility: an empirical analysis of AMT adoptions. M. H. SMALL and I. J. CHEN 3005
Hierarchical production planning and scheduling in a multi-product, multi-machine environment. M. M. QIU and E. E. BURCH 3023
A framework for measuring success of cellular manufacturing implementation. F. O. OLORUNNIWO 3043
Dynamic job assignment heuristics for multi-server batch operations – A cost based approach. D. J. VAN DER ZEE, A. VAN HARTEN and P. C. SCHUUR 3063
A parallel station heuristic for the mixed-model production line balancing problem. R. G. ASKIN and M. ZHOU 3095
A resources scheduling decision support system for concurrent project management. M. M. NKASU and K. H. LEUNG 3107
Scheduling in a Kanban-controlled flowshop with dual blocking mechanisms and missing operations for part-types. B. SHARADAPRIYADARSHINI and C. RAJENDRAN 3133
Study of the automatic planning of measurement points with basic element features. Z.-C. LIN and C.-C. CHEN 3157
Product structure complexity and scheduling of operations in recoverable manufacturing. V. D. R. GUIDE, JR, R. SRIVASTAVA and M. E. KRAUS 3179
Effects of high labour turnover in a serial assembly environment. S. T. HUTCHINSON, J. R. VILLALOBOS and M. G. BERUVIDES 3201
Book reviews 3225

No. 12 December 1997

Order overplanning with uncertain lumpy demand: a simplified theory. R. VERGANTI 3229

Extraction of manufacturing features from a feature-based design model. A. C. Lin, S.-Y. Lin and S.-B. Cheng 3249

A case for intelligent representation of dynamic resources in simulation. R. de Souza and Z. Y. Zhao 3289

Impact of throughput-based objectives and machine grouping decisions on the short-term performance of flexible manufacturing systems. Y.-D. Kim and C. A. Yano 3303

Multi-cyclic flow shop scheduling: an application in multi-stage, multi-product production processes. M. K. El-Najdawi 3323

Performance and R&D expenditures in American and Japanese manufacturing firms. H. C. Co and K. S. Chew 3333

Determination of a flexibility range for cellular manufacturing systems under product mix variations. H. Seifoddini and M. Djassemi 3349

A branch and bound algorithm for scheduling projects to maximize net present value: the case of time dependent, contingent cash flows. A. Shtub and R. Etgar 3367

Integrating order release control with due-date assignment rules. C.-H. Tsai, G.-T. Chang and R.-K. Li 3379

Optimal staffing for cyclically scheduled processes. J. K. Cochran, D. E. Chu and M. D. Chu 3393

Estimating the distribution and variance of time to produce a fixed lot size given deterministic processing times and random downtimes. D. S. Kim and J. M. Alden 3405

The application of tool path compensation for the reduction of clamping-induced geometric errors. E. C. De Meter and M. J. Hockenberger ... 3415

An integrated approach to multi-criteria design and control of manufacturing systems using simulation and goal-regression. R. Piplani and J. Talavage 3433

Representation and selection of assembly sequences in computer-aided assembly process planning. R. B. Gottipolu and K. Ghosh 3447

Static and dynamic operator allocation problems in cellular manufacturing systems. K. Bhaskar and G. Srinivasan 3467

An action strategy generation framework for an on-line schedulng and control system in batch processes with neural networks. W. Chen and M. Muraki 3483
